Title: ■ **Bearers of Global Jihad? Immigration and National Security after 9/11**
Url: http://www.nixoncenter.org/publications/monographs/Leiken_Bearers_of_Global_Jihad.pdf
Rights: Copyright © 2004 The Nixon Center
Notes: Link only

Description: This Nixon Center monograph is a groundbreaking assessment of the relationship between immigration and terrorism. The terrorist attacks of September 11th 2001 exposed stunning weaknesses in our national security and immigration systems. Yet these were not only governmental flaws. The attacks demonstrated an intellectual failure to understand the nexus between immigration and national security. This study takes a major conceptual step towards bringing the fields into fruitful relationship, producing policy relevant and pragmatic solutions built on a thoughtful assessment of the terrorist threat. Moreover it provides a historical analysis of the development of jihad, its modes of operation and its use of support networks in the United States. The study is about immigration and security in the West. Its juxtaposition of American and European experiences with immigration and terrorism makes a powerful argument for Atlantic cooperation. As Leiken argues, European terrorist networks have regenerated, finding traction among European Muslim immigrants. This report is wise in cautioning policymakers on both sides of the Atlantic to reappraise the policy that allows terrorists to enter the United States without so much as an interview by American authorities.
